

Introducing LSM Engineering

With the increasing pressure on Irish companies to meet EU legislative requirements on packaging waste recovery, and the spiralling costs of landfill, LSM Engineering based in Portlaoise in the centre of Ireland has grown to be Irelands leading commercial waste disposal manufacturer.

According to John Cummins, LSM Engineering's Sales Director, the company's success is founded on the performance and quality of their balers, and their commitment to customer service.

"Our clients are looking for optimum machine build quality, prompt customer service, keenly priced consumables, and up to date waste management knowledge and legislative information. They are not just looking for a baler, but for the most cost effective way to manage their waste".

From LSM Engineering's Irish design and manufacturing facility, in Portlaoise, Ireland, the company has developed an extensive customer base throughout Ireland and are now putting in place a structure to service the UK market. In addition to the their popular KERRUSH brand of Vertical and Mill Sized balers the company offers a specialist custom design and build service.

The company's customer base includes small to medium sized businesses looking to reduce their waste disposal costs, and also larger, high capacity users requiring waste separation at source and production of mill sized bales. By continuously monitoring changes in waste legislation, the company can advise their clients on meeting their waste management obligations.

The award of the **Guaranteed Irish Symbol** –which promotes Irish excellence, has further enhanced the company's reputation for quality.

THE PRODUCT RANGE

LSM Engineering's core product range consists of single chambers, multi chamber and mill size balers, either air or hydraulically powered. The range has been specifically designed to meet the needs of the waste, retail, hospitality, logistics and manufacturing sectors, ensuring that LSM Engineering can specify the right baler to meet specific customer requirements.

2003 will see a number of new models added to the existing Baler range, to be followed by the introduction of a new waste related product range.

THE SERVICES

Strategically located in their UK base just outside Birmingham, with customer service centres in the Midlands, Southwest, London and Lancashire, LSM Engineering can guarantee prompt and reliable service.

COMMITTED TO TOTAL CUSTOMER SATISFACTION:

Before commissioning, each LSM Baler is precision engineered, using cutting-edge laser technology to ensure conformity to the most exacting of quality control standards. By combining design and production expertise with dedicated back up service, the company guarantees the quality of every LSM product.
